

SECTION 0: Company Overview & Audience Context

Company Name:

Nebusis® Cloud Services, LLC

Website:

www.nebusis.com

Address:

12020 Sunrise Valley Dr, Reston, Virginia 20191, US

***** General Description:

Nebusis® is a Software-as-a-Service (SaaS) provider specializing in digital platforms that facilitate the implementation, operation, improvement, and automation of **ISO-based and non-ISO-based management systems**. The company develops smart, Al-enhanced applications that serve as tools for **digital transformation** across various industries and sectors.

Nebusis® also offers **special projects and advisory services**, supporting enterprise innovation and compliance through the integration of emerging technologies such as **AI**, **blockchain**, **IoT**, **data analytics**, **and automation frameworks**.

@ Core Product:

The **Nebusis® Business Suite** — a modular collection of 16 intelligent web-based applications designed for companies seeking better compliance, performance, and automation across their business operations.

The flagship and currently functional product is **Nebusis® ComplianceCore**, which consolidates ISO management system tools. The remaining modules are being actively developed and will be progressively deployed under a unified cloud environment.

© Key Features of the Business Suite:

- End-to-end business app suite
- Role-based access and enterprise-ready tools
- Modular: clients can license one or multiple apps
- Al integration for automation and decision support
- Real-time analytics, dashboards, and compliance reporting

Target Audience:

1. Small and Medium Enterprises (SMEs)

- Need efficient, cost-effective systems for management and compliance
- Often lack IT staff and need intuitive SaaS tools

2. Large Corporations

- Want modular apps for scalable digital transformation projects
- Interested in AI and automation of governance, risk, and compliance

3. Government & Public Institutions

- Require ISO-aligned systems, ESG monitoring, and transparency tools
- High interest in digital transformation of legacy systems

4. Professional & Certification Bodies

- Use Nebusis® KnowledgeCheck for competence validation
- Employ LMS and compliance tools to track certified professionals

5. Training & Academic Institutions

- Utilize the e-Learning Wizard and KnowledgeCheck for interactive training
- Can offer certifications and track learning effectiveness

Why This Matters for Website Development:

- The website must reflect the credibility and technological leadership of a trusted SaaS innovator.
- It must serve as a **commercial platform** (demo requests, license purchases, certification sales).
- It must function as a **learning and validation environment** (LMS and KnowledgeCheck).
- It must reinforce **trust**, **automation**, **and digital advancement** in both visuals and interactions.

SECTION 1: Home Page

@ Purpose:

To **immediately communicate** the identity, value proposition, and innovation of **Nebusis®**, encourage exploration of the Business Suite and services, and guide visitors toward action (demo, purchase, or contact).

Hero Section (Top Banner)

• Headline:

"Revolutionize Your Business with the Nebusis® Business Suite"

• Subheadline:

Al-powered tools for compliance, performance, automation, and transformation.

• Visual:

Animated explainer or video background showcasing interconnected modules

(ComplianceCore, SmartBooks, Engage, etc.)

- Primary CTA Buttons:
 - "Start Free Demo"
 - o "Explore Business Suite"
 - o "Buy a License"

features Preview - App Suite Snapshot

A grid or carousel showing all 16 Nebusis® apps with icons and brief names:

- Each card clickable to go to its app-specific page.
- Tag apps as:
 - **Live Now** (e.g., ComplianceCore)

Example app blocks:

Nebusis® SmartBooks

Al-enhanced financial control

Nebusis® Engage

Automate client onboarding

Why Choose Nebusis®? (Value Pillars Section)

Three-column layout:

1. Modular & Scalable

Use just one app or the entire suite

2. Al-Driven Productivity

Automate decisions, improve compliance, enhance accuracy

3. Ready for Transformation

Blockchain, IoT, cloud-native — future-ready from day one

✓ Digital Transformation Banner

Mid-page horizontal strip with:

- Slogan: "Supporting public and private sector digital transformation globally."
- Logos of sectors: Government, Energy, Health, Education, Manufacturing, etc.
- Optional client logo strip or rotating testimonials

Range Highlight: Video Callout

Section to feature one or two high-impact demo or promotional videos.

Click-through to full Video Gallery

🗱 Explore What We Offer

Two-column blocks or icon cards:

- Business Suite (explains SaaS tools)
- **Certifications** (explains self-guided LMS)
- Special Projects (blockchain, AI, digital transformation consulting)
- Industries Served (gov, finance, education, etc.)

Client Testimonial or Impact Quote (Optional)

Real-world feedback or case success story quote with client logo or name.

Newsletter Signup (Optional)

• Title: "Stay Ahead with Nebusis®"

• Short form: Name + Email

→ Call to Action Footer

- Bold CTA:
 "Ready to Transform Your Organization?"
- Buttons:
 - "Book a Demo"
 - o "See Pricing"
 - o "Buy a Certification"

- Built with: WordPress (Elementor or WP Bakery recommended)
- Responsive Design: Fully mobile optimized
- Multilingual: WPML plugin compatibility
- Stripe Integration: CTA buttons should be connectable to Stripe purchasing flow
- Admin Editable: All text, icons, and video sections editable via admin dashboard (use Advanced Custom Fields Pro if needed)

♦ SECTION 3: App Landing Pages (Template for Each Nebusis® App)

Each app (e.g., **Nebusis® SmartBooks**, **Nebusis® Engage**) will have its **own dedicated landing page** using a consistent structure. This ensures clarity, brand consistency, and user engagement.

Layout Structure for Each App Page

1. Hero Section (Top Banner)

- App Name: (e.g., Nebusis® Engage)
- One-Sentence Tagline: (e.g., "Al-driven client lifecycle automation for smart growth.")
- Call-to-Actions:
 - o "Start Free Demo"
 - o "See Pricing"
 - o "Buy License"
- Visual: High-quality illustration or short animation representing app use

2. What It Does

- Short overview paragraph explaining the purpose and unique value of the app
- Bullet list of main use cases or benefits
 - o e.g., for Engage:
 - Automates intake, proposals, contracts, and onboarding
 - Integrates client communication via chat, email, and forms
 - Speeds up activation and reduces manual work

3. Core Features

Display 4–8 icons or cards with titles + brief descriptions:

- Tailored to each app (SmartBooks will list double-entry ledger, dashboards, etc.)
- e.g., for Nebusis® SmartBooks:
 - o 🔢 Real-Time Ledger

- Multicurrency Support
- Customizable Dashboards
- API-Ready Architecture

4. How It Works (Visual Flow or Explainer)

 Infographic or visual process showing how users interact with the app (e.g., Input → Process → Output → Reports/Action)

5. Screenshots or Short Demo Video

- Clickable image gallery or 30–60 sec demo (auto-muted)
- Optional "Launch Interactive Demo" CTA (restricted behind form submission)

6. Integration & Compatibility

- Icons/logos of platforms the app integrates with (e.g., Stripe, MySQL, Microsoft 365)
- Badge: Built on Nebusis® Technology Stack (Golang, React, MySQL, Al, n8n, etc.)

7. Plans & Pricing Section

- Simple 2–3 tier plan with pricing (Starter, Pro, Enterprise)
- "Buy Now" button connected to Stripe
- License duration: Monthly, Annual

Auto-renew and 45-day expiration reminder noted

8. Who Uses This App?

- Show icons or names of industries/roles:
 - o E.g., "For Accounting Teams, Startups, SMEs, CFOs" for SmartBooks
 - o "Ideal for Sales, Support, Onboarding Teams" for Engage

9. Optional: Testimonials / Success Stories

- Pull from case studies or satisfied beta users
- Include client logo + quote

10. Call to Action Footer

- Highlight benefit again:
 - "Transform your [Finance | Client Engagement | Compliance] process today."
- CTA Buttons:
 - "Start Free Demo"
 - o "Contact Sales"
 - o "Buy License"

Technical Notes for Developer

- WordPress structure should use custom post types for App Pages
- Editable with Elementor or WPBakery
- Admin must be able to:
 - Upload new screenshots
 - Modify pricing
 - Update descriptions and icons
- Stripe checkout integration required
- Demo form gated and Al-validated (as discussed previously)

SECTION 4: Certifications Platform

Purpose

To allow individual professionals and companies to:

- Browse available certifications
- Purchase courses online (via Stripe)
- Complete the course or assessment
- Automatically generate and download a certificate
- Get notified for renewal before expiration

Platform Components

- 1. Landing Page: "Nebusis® Certifications"
 - Headline: "Empower Your Team. Validate Your Expertise."

- Filters: by Category (e.g., Digital, Governance, Management), Level (Basic, Advanced), or Language
- Card-style course listings:
 - o Title + Icon
 - Short Description
 - Duration
 - o Price
 - o "Buy & Start" Button

2. Course Detail Page

- Course Objectives
- Who it is for
- What is included (PDF, video, quiz, etc.)
- Sample content preview
- Price and payment link (Stripe integration)
- Terms & renewal cycle (if applicable)

3. Instant Activation & Learning

- User purchases course
- Email confirmation + dashboard access to start
- Auto-launches learning module built on Nebusis® e-Learning Wizard
 - Self-paced materials

- Al-interactive quizzes (optional KnowledgeCheck integration)
- Final assessment triggers certification

4. Certificate Generation

- Upon successful completion:
 - Auto-generate certificate (PDF + digital badge)
 - o Includes unique verification number & QR code
 - o Option to share on LinkedIn or download
- Stored in user dashboard (My Certifications)

5. Admin Tools

- Admin can upload new courses (PDF, videos, quiz questions)
- Set pricing and expiration
- Track who earned what
- Issue manual corrections if needed

6. Renewals and Notifications

- Expiring in 45 days: users receive automatic renewal alert (email + dashboard notice)
- Option to retake test or buy update course
- Expired status shown if not renewed

X Technical Implementation

- Built on WordPress LMS-compatible plugin (e.g., LearnDash or TutorLMS)
- Stripe integration for secure payments
- Automated course completion tracking
- Certificate template editor
- Mobile-compatible
- Integrated with Nebusis® user management and access control

SECTION 5: Demo Access & Al Validation Flow

@ Purpose

To allow users to **request a demo** of Nebusis® apps directly from the website, while protecting the platform from speculative users, bots, or competitors through a **semi-automated Al due diligence process.**

Demo Request Flow

- 1. Demo CTA Buttons (Site-Wide)
 - Buttons labeled:
 - o "Request a Demo"
 - o "Try it Now"
 - "Launch Free Demo"
 - Appears on:
 - Product pages

- Homepage
- Footer
- o Pop-ups / banners

2. Demo Request Form (Gated Entry)

Mandatory fields:

- Full Name
- Job Title
- Organization Name
- Work Email (corporate domain required)
- Phone Number
- Country / Region
- Industry
- Select app(s) of interest
- Purpose of request (dropdown: Procurement, Trial, Academic, Other)

3. Al-Based Due Diligence Check

After form submission:

- An Al Agent performs background checks by:
 - Verifying email domain (e.g., no free providers like Gmail)
 - o Cross-checking business presence online
 - Assessing company legitimacy and role fit

- Assigning a Demo Eligibility Score
- If the score is above threshold, the demo is automatically approved
- If the score is **borderline or low**, it flags for **manual review** (optional fallback to human team)

4. Approved Users: Demo Access

Once approved:

- User receives:
 - Confirmation email with login link and instructions
 - Temporary access to demo environment (sandbox)
 - Session expires after defined trial period (e.g., 48h or 5 uses)

5. Denied or Flagged Users

- Denied users receive a soft message:
 - "Thank you for your interest. Our team will follow up to determine if a customized demo is available for your organization."
- Admin is alerted and can decide on manual override

6. Admin Panel Features

Admins can:

- View all demo requests and scores
- Manually approve or deny access
- View analytics on conversions

Define access duration, number of apps, and role permissions per demo type

X Technical Requirements

- Form built in WordPress using Forminator Pro or WPForms + backend API
- Al Agent hosted on Nebusis® backend or integrated via Relevance Al, LangChain, or similar
- Demo environments provisioned in secure containers (staging or micro-tenant setups)
- User access management integrated with Nebusis® portal and access control logic

SECTION 6: Special Projects & Emerging Technologies

@ Purpose

To present Nebusis® not only as a SaaS provider but also as a strategic partner for organizations seeking **custom digital transformation solutions** leveraging emerging technologies and data-driven design.

This section positions Nebusis® as an expert-led force for innovation and modernization in **public sector**, **SMEs**, **corporate environments**, and **regulated industries**.

Structure and Content

1. Header Title:

"Beyond SaaS: Your Digital Transformation Partner"

2. Subheading:

"We combine our proprietary Nebusis® Business Suite with cutting-edge technologies to accelerate transformation across industries."

3. Key Services Overview

Present the following as high-impact cards or icons with one-liner explanations:

— Al & Automation

Intelligent automation using LLMs, workflow bots, AI-powered customer and compliance tools

Smart contracts, traceability, and transparency in logistics, identity management, and compliance

• **(f)** IoT Integration

Real-time operational monitoring and performance tracking through sensor-based systems

Advanced Analytics

Predictive dashboards and reporting for decision-making and continuous improvement

Implementation of security protocols aligned with ISO 27001 and real-time threat visibility

X Custom App & System Development

Specialized business process applications built on the Nebusis® Technology Stack

4. Use Case Examples

Simple layout with 2–3 real or hypothetical examples like:

- *Government Modernization:* Deployment of Nebusis® ComplianceCore + Blockchain identity system in public agencies
- Industrial IoT Integration: SmartBooks + IoT for tracking machine maintenance and performance
- *Education:* e-Learning Wizard + Al-based KnowledgeCheck to validate student proficiency with no human proctor

5. Call to Action

- Button: "Request a Digital Transformation Consultation"
- Button: "Submit a Special Project Inquiry"
- Form: Collects organization name, challenge description, key goals

X Technical Implementation Notes

- Form should notify business development team and auto-log to CRM
- All project inquiries should trigger a workflow inside Nebusis® Engage
- Integration with document automation (Nebusis® LegalFlow) for proposal generation

SECTION 7: Multimedia & Video Gallery

@ Purpose

To provide visual and interactive content that educates, inspires, and builds trust with visitors by:

- Demonstrating product functionality
- Showcasing client success stories
- Providing thought leadership on digital transformation and management system innovation

¥ Gallery Features and Structure

1. Main Page Layout

A sleek, dynamic multimedia wall with filter tabs such as:

- Product Demos
- How It Works
- Client Use Cases
- Sustainable Impact Stories

Each thumbnail includes:

- Title
- Duration
- Category Tag
- "Watch" button

2. Embedded Video Player

- In-page player that does **not redirect** to YouTube or other platforms (unless chosen)
- Option to enable subtitles (multilingual support)
- Responsive mobile viewing

3. Featured Video Strip (Homepage)

- Highlight one or two trending videos directly on homepage or product pages
- Example: "See How Nebusis® Engage Automates Client Onboarding in 90 Seconds"

4. Admin Upload Panel

Accessible only by authenticated admin users, the backend allows:

- Uploading new videos (MP4, YouTube/Vimeo embedded links)
- Adding title, description, tags, categories
- Publishing and archiving controls
- Custom thumbnail uploader
- Multilingual video labels

5. Optional Enhancements

- Add search bar and "Most Viewed" or "Newest" sorting
- Enable Al-generated transcripts and summaries
- Add lightboxes or modals for clean pop-up viewing

X Technical Notes

- Built using a WordPress gallery plugin like Envira Gallery, All-in-One Video Gallery, or custom Elementor block
- Ensure **video hosting is optimized** (Cloudflare Stream, Bunny.net, or YouTube/Vimeo for heavy load)
- Accessible from both desktop and mobile
- Designed to integrate with Nebusis® branding and style guide

SECTION 8: Admin Dashboard & Content Control

To provide authorized Nebusis® staff with secure, simplified, and powerful backend tools to manage content, media, branding, user access, and automated features—without needing daily developer support.

🔐 1. Admin Login Access

- Access via: https://nebusis.com/admin
- Credentials-based login (username + password)
- Admin roles created manually by the Super Admin
- Optional: Two-factor authentication (2FA) and Google reCAPTCHA
- All pages served via HTTPS with SSL encryption

2. Core Admin Features

Branding & Identity Management

- Upload/update:
 - Company logo (light/dark versions)
 - Favicon
 - Tagline or slogan
 - Company contact details
- Global color palette & typography settings

Media & Asset Library

- Upload and organize:
 - Photos, icons, logos (JPG, PNG, SVG)

- Videos (linked or uploaded MP4)
- PDFs (product brochures, whitepapers)
- Tagging and sorting by section (e.g., homepage, gallery, app page)

Website Content Editor

- Gutenberg or Elementor blocks for editing:
 - Home page text
 - App descriptions
 - Case studies
 - News or announcements
- Multi-language toggle (English, Spanish, Portuguese, others)

!! User Role & Access Management

- Roles:
 - Super Admin (full access)
 - Content Manager (text, photos, uploads)
 - Sales Admin (pricing, licensing, renewals)
- Admins can assign, revoke, or limit access per section

3. Product & License Configuration Panel

- Add/remove SaaS product cards
- Activate Stripe payment buttons
- Set pricing tiers and billing intervals

- Enable/disable demo buttons
- Define license expiration periods

7 4. Automation & Renewal Settings

- Trigger notifications:
 - **45 days before** license or certificate expiration
 - Sent via email with auto-generated renewal link
- Apply to:
 - SaaS licenses (e.g., Nebusis® SmartBooks, Engage)
 - o Course-based certifications (e.g., via Nebusis® KnowledgeCheck or LMS)

2 5. Video & Gallery Manager

- Upload video links or files to the site's media section
- Assign to categories (Demo, Case Study, Promo)
- Set thumbnails and captions
- Embed with or without external hosting (e.g., Bunny.net, YouTube)

📊 6. Optional Dashboard Analytics Widget

- Track:
 - Page views
 - Form submissions

- o Demo requests
- License activations
- Use Google Analytics, Jetpack, or Matomo

🗱 7. Technical Implementation Notes

- Platform: WordPress backend
- Recommended plugins:
 - Advanced Custom Fields
 - User Role Editor
 - WPForms or Gravity Forms
 - Stripe for WooCommerce or WP Simple Pay
- All admin activity logs stored and auditable
- Optimized for responsive and mobile admin use

♦ SECTION 9: Contact, Support & Al Chatbot

© Purpose

To provide prospective and existing users with fast, efficient, and scalable support while maintaining a professional image and capturing valuable user information.

1. Contact Page

- Contact Form:
 - Full name

- Company/Organization
- Email
- Phone (optional)
- Country
- Reason for contact (dropdown: Sales Inquiry, Technical Support, Partnership, Media, Other)
- Message box
- o reCAPTCHA verification
- Contact Details Section:
 - Nebusis® address:
 12020 Sunrise Valley Dr, Reston, Virginia 20191, US
 - o Email: info@nebusis.com
 - Phone (optional field depending on final setup)
- Embedded Map (Google Maps) showing office location

ia 2. Al-Powered Chatbot Assistant

- Embedded chatbot widget on **bottom right of all pages**
- Developed using open-source or proprietary LLM integration
- Features:
 - Answers FAQs about each app
 - o Provides product descriptions, pricing, and links to demo request forms
 - o Directs users to appropriate contact forms if a live agent is needed

- o Gathers initial lead info: Name, Email, Use Case, Company Size
- Triggers demo access verification process

3. Smart Demo Verification Process

- Before granting access to a demo:
 - The Al Agent performs due diligence on submitted contact details (email domain, company, location, etc.)
 - If deemed valid and not speculative/competitive:
 - Auto-sends demo access credentials
 - Logs visitor info into CRM or internal sales dashboard
 - If flagged as suspicious:
 - Sends alert to admin for manual review

1 4. Live Support (Optional Future Feature)

- Placeholder for live chat or ticketing system (e.g., Tawk.to, Freshdesk, or HubSpot)
- Toggleable visibility based on traffic/load

5. Support Email Routing

- Internal logic to route form submissions:
 - Sales inquiries → sales@nebusis.com
 - Technical support → support@nebusis.com

General inquiries → info@nebusis.com

Section 10: Demo Request & Access Control

@ Purpose:

Allow potential clients to request access to demonstrations of Nebusis® Business Suite applications, while protecting proprietary technology from competitors or speculative users.

★ Key Features

2 1. Demo Access Request Form

- Required fields:
 - Full name
 - Company name
 - Company website (optional)
 - Business email (no personal domains like @gmail)
 - Country & industry
 - o Job title
 - Which app(s) they are interested in
 - Purpose of the request
- Checkbox for accepting Terms of Use and Non-Disclosure Policy

ia 2. Al-Powered Due Diligence Screening

• All demo requests are automatically analyzed by an Al agent trained to:

- Identify suspicious or non-qualified users (e.g., free email domains, competitors)
- Verify business information online
- Flag unusual patterns for manual review
- Approved users receive a demo link with time-limited access
- Rejected users are politely informed with a message suggesting contact with sales

☆ 3. Automated Workflow

- Successful submissions:
 - Trigger a customized approval email with secure demo link
 - o Add user to CRM and mark lead source as "Demo"
 - Log demo request and approval status in admin panel
- Rejected or flagged:
 - Logged for review by sales team
 - Option to override by admin

4. Admin Panel Functions

- View all demo requests
- Approve/deny manually if needed
- Adjust Al filter criteria
- Export data to CSV

Section 11: Pricing & Plans

@ Purpose:

To present a transparent, modular, and scalable pricing strategy for all **Nebusis® Business Suite** applications. This section supports both direct purchases and custom enterprise engagements.

A. Modular SaaS Pricing Overview

Nebusis® Application	Setup Fee	Annual License (1–3 Users)	Extra Users (Annual)	Notes
Nebusis® ComplianceCore (Includes 1 ISO Wizard)	\$1,500	\$1,500	\$10/user/month	Foundation for compliance and ISO system management
Additional Nebusis® ISO Wizards	\$750	\$750	\$5/user/month	Plug-in modules for each ISO or legal framework

Nebusis® Performance Tracker	\$750	\$750	\$5/user/month	Role-based performance tracking and accountability
Nebusis® Supply Chain Wizard	\$750	\$750	\$5/user/month	Supplier tracking and logistics oversight

All pricing is billed annually. Licenses include ongoing updates and technical support.

★ B. Online Pricing Calculator

- Customers can:
 - Select Nebusis® modules
 - Define number of users
 - Add training sessions
 - Automatically calculate setup, license, and taxes
 - Pay directly via Stripe
 - Receive onboarding instructions instantly

Ø C. Training & Add-On Services

Service Price

Additional Nebusis® ISO Wizard \$750 setup + \$750/year for 1–3

users

Extra user (base apps) \$10/month billed annually

Extra user (add-on apps) \$5/month billed annually

Training session (1 day, up to 10

users)

\$1,000

Additional ½ day training \$500

D. Automated Renewals

- 45- and 15-day notifications for:
 - SaaS license expiration
 - Certificate renewals (via Nebusis® KnowledgeCheck & Nebusis® e-Learning Wizard)
- Alerts via email + in-app dashboard

E. Flexible Licensing Paths

- **Self-Service**: Through automated checkout
- Enterprise Engagements:
 - Special pricing for multi-module clients
 - Government, NGO, or regulated industry support
 - o Customization, integration, and implementation services available

🎁 F. Volume Discount Tiers

Number of Apps Licensed	Discoun t
3–4 apps	10% off
5–7 apps	15% off
8+ apps	20% off

Nebusis® ComplianceCore

Integrated ISO Management System Wizard

Description

Nebusis® ComplianceCore is a robust, all-in-one management system platform that helps organizations of any size implement, maintain, and improve compliance with ISO and regulatory standards. From documentation control to audits, risks, and corrective actions—ComplianceCore consolidates your compliance framework into one intuitive digital environment.

Built specifically to support ISO standards (such as ISO 9001, ISO 14001, ISO 45001, and more), it replaces spreadsheets and paper-based systems with structured modules designed around the Plan-Do-Check-Act (PDCA) cycle.

Key Modules Included

Module	Purpose
Dashboard	Centralized interface to view metrics and access modules.
Organizational Structure	Manage departments, roles, positions, org charts, and personnel data.
Context of the Organization	Define strategic issues, scope, interested parties, and legal obligations.
Risks & Opportunities	Identify, evaluate, and monitor risks and opportunities.
Products & Services	Maintain detailed profiles of your services or product lines.

Infrastructure Register, maintain, and monitor equipment and infrastructure.

Processes Define core processes, procedures (SOPs), and KPIs.

Management System

Policies

Create and manage system-wide and clause-specific policies.

Documented Information Control all documentation and records via a centralized

master list.

Planning Set and track strategic and operational objectives.

Project Management Plan, execute, and evaluate compliance-related projects.

Operational Improvement Log incidents, initiate corrective actions, and track

improvements.

Internal Audits Plan, conduct, and manage audit cycles and findings.

Meetings & Reviews Manage management reviews, action follow-ups, and

strategic meetings.

Perfect For

- Quality, environmental, and safety managers
- Organizations seeking ISO certification
- Consultants standardizing client compliance
- Enterprises replacing paper and Excel-based systems

Benefits

- Aligned with ISO 9001, ISO 14001, ISO 45001, and others
- Modular, scalable structure for multi-standard compliance
- Automation of PDCA processes
- Full document and audit trail traceability

- Multi-user access with role-based permissions
- Cloud-based and accessible 24/7

N

Nebusis® PowerDocs

Smart, Secure Document Management for Modern Businesses

Nebusis® PowerDocs is an Al-powered document control system designed specifically for small and mid-sized enterprises (SMEs), corporations, and compliance-driven organizations. It combines the ease-of-use of familiar platforms with the rigor, traceability, and intelligence required for serious business operations.

What Makes PowerDocs Different?

While tools like **Google Docs**®, **SharePoint**®, **and Dropbox**® handle everyday files, they fall short when your documents must be **controlled**, **approved**, **and auditable**. PowerDocs brings together:

- Structured compliance map documents to specific clauses, standards, or business policies
- **V** Al-assisted generation create SOPs, policies, and manuals in minutes
- **End-to-end control** from creation to review, approval, publishing, and archival
- W Built-in traceability automatic audit trails for every interaction
- **V** Seamless suite integration works with all other Nebusis® Business Suite apps

Feature Comparison: Why PowerDocs Wins

Feature / Capability PowerDocs SharePoint® Google Dropbox®
Docs®

Document version control	✓ Native & automatic	⚠ Manual setup	Limited (manual copies)	A Basic
Al-generated documents (SOPs, policies)	✓ Built-in AI engine	X Not native	X Not native	X Not available

Built for Your Business — Not Just Big Corporations

Whether you are:

- A **growing SME** ready to standardize operations
- A corporate team tired of uncontrolled spreadsheets and approvals
- A distributed company that needs secure collaboration with governance

...Nebusis® PowerDocs delivers professional-grade control without the cost and complexity of legacy systems.

Real Document Control, Not Just Cloud Storage

- Role-based access and permission models
- Encrypted storage and secure backups
- Export to certificate-grade PDFs
- Analytics dashboard for usage, workflow status, and overdue reviews
- **| Auto-organized library** by process, policy, or obligation

♦ Use PowerDocs For:

- Policy & procedure management
- HR manuals & employee communications
- SOPs, work instructions, technical specs
- Contracts, compliance records, and more

Integrated with the Nebusis® Business Suite

Connect seamlessly with:

- **Nebusis® ComplianceCore** link policies to management systems
- Nebusis® PeopleCore manage training records and responsibility by role
- Nebusis® Engage automatically share approved documents with clients or stakeholders
- **Nebusis® KnowledgeCheck** embed live policies into competence assessments

Be the first to try Nebusis® PowerDocs. Early access will be offered to qualifying SMEs, implementation partners, and digital transformation clients.

Nebusis® SmartBooks

Intelligent Financial Control & Accounting Across Borders

Nebusis® SmartBooks is a next-generation financial management solution purpose-built for SMEs and growing organizations operating in complex, multi-jurisdictional environments. More than just an accounting system, it serves as a financial control hub that automates compliance, streamlines reporting, and integrates seamlessly with other business functions in the **Nebusis® Business Suite**.

Key Features

Feature	Description
Multi-Entity Accounting	Manage multiple companies, branches, or cost centers under a single interface.
Multi-Currency, Multi-Tax	Automate currency conversion and handle tax regulations across different countries.
Custom Chart of Accounts	Tailor your chart to comply with local standards and your organizational structure.
Automated Journal Entries	Auto-generate recurring entries, depreciation, accruals, and adjustments.
Real-Time Dashboards	Get live financial KPIs, budget tracking, and visual performance analytics.
Invoice & Payment Automation	Generate, send, and track invoices and payments with built-in alerts.
Integrated Budgeting & Forecasting	Plan and track budgets, cash flows, and scenario forecasts.
Audit-Ready Trails	All transactions come with complete audit logs and access control.

* Technical Strengths

• Backend: Golang with Gin framework

• Frontend: React 18+, TypeScript, TailwindCSS

• **Database**: MySQL 8.0 with scalable schema for multi-tenant setups

• Security: Role-based access control (RBAC), encrypted data at rest and in transit

• API-First: Easy integration with banking platforms, ERPs, tax authorities

 Compliance Hooks: ISO 27001 & ISO 37301 alignment for financial integrity and compliance

VS Competitor Comparison

Feature / System	Nebusis® SmartBooks	QuickBooks	Xero	SAP Business One
Multi-company, multi-currency	✓ Built-in	X Limited	A Partial	V

• SMEs needing an all-in-one legal document engine

- HR teams issuing employment or contractor agreements
- Procurement teams managing vendor or supplier contracts
- Legal departments requiring traceability, automation, and policy enforcement
- Any company replacing manual legal workflows with secure, scalable solutions

Why Choose Nebusis® LegalFlow?

- Material in the second of the s
- Electric Contracts, reviews, approvals, and signatures—all in one approvals.
- Seamless integration with other Nebusis® Business Suite apps
- Easily deployed, no special infrastructure required

₹ Nebusis® ESG GreenCore

Sustainability Intelligence for Smarter, Greener Operations

Nebusis® ESG GreenCore empowers businesses to measure, monitor, and improve their Environmental, Social, and Governance (ESG) performance. Built for organizations seeking transparency, stakeholder trust, and long-term sustainability, GreenCore helps you align with leading ESG frameworks and comply with emerging regulatory mandates.

Whether you are a small business starting your ESG journey or an established enterprise preparing detailed sustainability disclosures, ESG GreenCore simplifies the complexity—so you can act with clarity and confidence.

ESG Area Key Capabilities

Environmental Track emissions, energy use, water, waste, and materials by site or

process.

Social Monitor workforce diversity, community impact, health and safety KPIs.

Governance Document ethics policies, board diversity, anti-corruption measures.

Compliance Align with frameworks like GRI, SASB, CSRD, and TCFD.

Reporting Auto-generate ESG reports by category, framework, or stakeholder needs.

Dashboards Visualize ESG indicators across time, departments, and facilities.

Benchmarking Compare ESG performance against goals or peer companies.

X Technical Framework

• Backend: Golang + Gin Framework

• Frontend: React 18.2+, TypeScript 5.0+, Tailwind CSS 3.4+

• Al & Workflow Automation: Relevance Al + n8n

• Database: MySQL 8.0

• **Visualization**: Integrated charting libraries + custom KPI builders

• Security: Role-based access, audit trails, encryption at rest

- Nebusis® ComplianceCore: Link evaluations to clauses from ISO standards
- Nebusis® Engage: Assess client knowledge or readiness before onboarding
- Nebusis® SmartBooks: Validate finance team understanding of compliance protocols

Ideal Use Cases

- SMEs & Corporations: Test staff understanding of SOPs, policies, safety, or quality protocols
- Consulting & Audit Firms: Validate consultant knowledge before deployment
- Regulatory & Compliance Teams: Provide verifiable, real-time competence checks
- Training Providers: Issue competence-based certification on-demand
- Universities & Institutes: Run knowledge tests tied to academic or vocational content

💡 Why Nebusis® KnowledgeCheck?

- Description
 Reduce evaluation time from weeks to minutes
- Renerate traceable, standardized competence results
- Al-powered dialogue creates higher engagement than static tests
- III Data-driven insights for HR, training, and leadership
- Optional link to certification or course credentials

✓ Nebusis® Performance Tracker

Align Goals. Track Results. Empower Teams.

Nebusis® Performance Tracker is a lightweight, Al-augmented performance management system designed to help teams set goals, track work, and stay aligned—especially in hybrid or remote environments. It eliminates messy spreadsheets and inconsistent reporting by introducing a structured, visual, and real-time performance dashboard.

Whether your organization follows a formal PDCA cycle or simply wants a clear view of who is doing what and how well—it all starts here.

Q Core Functionalities

Function	Description
Goal Setting	Team members define monthly objectives aligned to strategic plans
Weekly Activity Logs	Users record actions and progress with minimal effort
Supervisor Dashboards	Managers track individual and team performance in real time
PDCA Reporting Engine	Automated generation of Plan-Do-Check-Act summaries for each team or objective
Visual Timeline View	Graphical progress indicators across weeks or months

Collaboration Tools	Built-in notes, comments, and coaching logs between users and supervisors
Automated Reminders	Customizable prompts to ensure updates are made on time
Real-Time Analytics	Track productivity trends, commitment vs. execution, and impact metrics

X Technical Architecture

• Frontend: React 18+, Tailwind CSS, shadon/ui components

• Backend: Golang 1.21+, Gin framework

• Database: MySQL 8.0

- Workflow & Automation: n8n for reminders, triggers, and reporting queues

- Z Saves hours of administrative time per week

- Improves transparency and supports data-driven decisions
- Offers insights to fuel recognition, support, and growth

Nebusis® Workflow Engine

Automate processes. Eliminate delays. Scale without chaos.

Overview

Nebusis® Workflow Engine is the central automation powerhouse of the Nebusis® Business Suite. Designed to streamline and orchestrate internal processes across departments, this engine empowers businesses—especially SMEs and mid-sized enterprises—to move faster, with fewer errors, and improved accountability.

Whether it's onboarding a new client, processing approvals, routing tasks between departments, or closing out incidents, Nebusis® Workflow Engine turns manual actions into automated flows, with logic you control and visibility you can trust.

* Key Features

Feature	Description
Visual Workflow Builder	Drag-and-drop interface for defining multi-step workflows without coding.
Conditional Logic & Rules	Set triggers, conditions, approvals, and escalations based on business rules.
Cross-App Integration	Connect seamlessly with other Nebusis® modules (e.g., ComplianceCore, Engage, LegalFlow).
Role-Based Routing	Automatically assign tasks and approvals to users based on roles, functions, or workload.
Notifications & Reminders	In-app alerts and email notifications to prevent delays or missed deadlines.
Audit Trail	Complete log of all workflow activity for compliance, accountability, and traceability.

Attach forms, checklists, or document templates to each stage of the process.

- Scales effortlessly across departments and organizational levels
- Maximizes ROI by activating automation within your business ecosystem

Nebusis® CyberWatch

Proactive cybersecurity for smart, scalable organizations.

Overview

Nebusis® CyberWatch is a next-generation cybersecurity management module designed to help small and medium-sized enterprises (SMEs), corporate environments, and digital-first organizations manage cyber risks, compliance, and incident response—all within a lightweight, user-friendly platform.

It enables you to assess your cyber posture, implement best practices aligned with frameworks like ISO 27001, NIST, or SOC 2, and monitor key controls, vulnerabilities, and corrective actions in real time—without needing an in-house cybersecurity team.

Rey Features

Functionality	Description
Cyber Risk Assessment Wizard	Guided, customizable risk assessment aligned with top frameworks (e.g., ISO 27001, NIST).
Control Library & Task Manager	Map controls to responsibilities, assign tasks, track implementation.
Security Incident Log	Report and track cyber incidents, vulnerabilities, and breach investigations.
Corrective & Preventive Action Plans (CAPA)	Al-assisted planning and monitoring of remediation activities.

Compliance Gap Tracker Visual dashboards showing compliance with selected cybersecurity standards. **Asset & System Register** Maintain an inventory of systems, networks, and software subject to controls. Centralized digital audit trail of all activities and changes.

Integrated With:

- **Nebusis® ComplianceCore** For policy, risk, and audit alignment
- Nebusis® SmartBooks For control budget tracking
- Nebusis® Workflow Engine For automated task routing and notifications

Why Choose Nebusis® CyberWatch?

- Built to **simplify** cybersecurity for organizations without internal IT security teams
- Enables **real-time awareness** of risk and compliance gaps
- Automates implementation of best practice controls
- Provides a single source of truth for audits, inspections, and management reviews
- Seamlessly integrates into your broader compliance, governance, and business operations through the Nebusis® Business Suite

End-to-end visibility and control across your supply network.

Overview

Nebusis® SupplyChain Wizard empowers businesses to manage suppliers, procurement, logistics, and fulfillment processes with a smart, streamlined, and collaborative platform. Built specifically for growing organizations, it centralizes supplier performance, purchase workflows, and logistics coordination—enabling agility and resilience across supply operations.

It integrates seamlessly with **Nebusis® SmartBooks**, **Inventory Wizard**, and **ComplianceCore**, making it an ideal foundation for businesses looking to scale efficiently while maintaining full traceability and control.

Key Features

Functionality	Description
Supplier Management	Register, evaluate, and track supplier performance over time.
Purchase Order Automation	Create, issue, and track POs with customizable approval flows.
Vendor Portals	Give suppliers secure access to orders, invoices, and communications.
Logistics Coordination	Schedule and monitor inbound/outbound shipments and deliveries.

Cost & Delivery Analytics	Track pricing trends, delivery times, and quality metrics.
Risk & Compliance Records	Maintain documentation, certifications, and risk assessments for suppliers.
Dynamic Procurement Planning	Suggests optimal suppliers and reorder points based on cost, risk, and performance data.

- Built-in intelligence reduces manual tasks and decision delays
- Designed for scaling businesses managing goods, assets, or supplies
- Flexible configurations to suit healthcare, retail, manufacturing, or services
- Part of the comprehensive Nebusis® Business Suite ecosystem

Mebusis® Client360

Your complete command center for customer relationship and experience management.

Nebusis® Client360 centralizes all customer interactions, transactions, feedback, and engagement history into a single, Al-enhanced platform. It enables businesses—especially SMEs—to manage relationships across the full customer lifecycle, driving retention, loyalty, and growth without needing multiple disconnected CRM tools.

Unlike legacy CRM tools that require extensive customization, Nebusis® Client360 works out of the box and is pre-integrated with other Nebusis® apps such as **Engage**, **PowerDocs**, and **SmartBooks**, giving you a truly connected customer experience ecosystem.

Key Features

Functionality	Description
360° Customer View	Unified dashboard of contacts, interactions, purchases, and documents.
Lead & Contact Management	Capture, track, and update lead info with flexible custom fields.
Activity Timeline	Al-driven timeline shows every call, proposal, contract, or payment across all touchpoints.
Customer Segmentation	Tag, group, and filter customers based on industry, behavior, or engagement.
Communication Logs	Store email, chat, and meeting history linked to each contact.
Follow-up Reminders	Schedule intelligent prompts and action flags for team accountability.
Integration with Engage & PowerDocs	Auto-generate contracts and invoices and track proposal stages.
Role-Based Dashboards	Sales, Support, and Executives get tailored views of client data.

■ Nebusis® SmartBooks

Smarter Financial Control for Organizations Ready to Scale

Nebusis® SmartBooks is a next-generation financial control and accounting solution tailored for growing organizations that require more than just bookkeeping. Designed to empower small and mid-sized enterprises (SMEs), project-based firms, and multi-entity organizations, it combines robust accounting features with intelligent automation, analytics, and seamless compliance integration.

Fully aligned with global best practices and adaptable across industries, SmartBooks ensures your financial management stays future-ready—while reducing dependency on spreadsheets, fragmented tools, or overly complex legacy ERPs.

Key Functional Modules

- General Ledger Management Configurable chart of accounts with multi-standard compliance
- Accounts Payable & Receivable Invoice lifecycle management with real-time tracking and automated alerts
- Banking Integration & Reconciliation Secure multi-bank integration for effortless reconciliations
- Budgeting & Forecasting Define budgets, track variances, and generate Al-powered forecasts
- Project-Based Accounting Allocate costs and revenue across clients, projects, or cost centers
- **Multi-Entity, Multi-Currency Support** Designed for global operations with complex organizational structures
- Tax Calculation & Reporting Embedded tax engines for local, regional, and international compliance
- **Financial Statements & KPIs** Generate balance sheets, income statements, and real-time performance dashboards
- Al-Powered Anomaly Detection Smart alerts for unusual transactions and expense outliers

Why Choose Nebusis® SmartBooks?

Unlike many general accounting tools that focus solely on bookkeeping, **Nebusis® SmartBooks bridges accounting, compliance, and strategic control**—bringing the visibility and intelligence typically reserved for large ERPs into a platform made for lean and growing operations.

- Entrepreneurs and SMEs ready to graduate from spreadsheets or oversimplified tools
- Finance and operations teams looking for real-time coordination between accounting and strategic goals
- Project-based organizations managing multiple cost centers, clients, or regions
- Companies with global operations needing robust multi-currency and multi-entity controls
- Consultants and compliance professionals who require seamless audit readiness

SmartBooks will be fully integrated into the **Nebusis® Business Suite**, enabling one-click interoperability with modules like:

- Nebusis® PeopleCore for payroll & HR cost tracking
- Nebusis® Supply Chain Wizard for vendor and procurement financials
- Nebusis® ComplianceCore for ISO audit trail and policy integration
- **Nebusis® PowerDocs** for automated financial policy documentation

Move beyond bookkeeping. Lead with intelligence.

Nebusis® SmartBooks is not just an accounting platform—it is your financial control tower.

Nebusis® Digital Transformation Services

We guide organizations through full or phased digital transformation—modernizing legacy systems, integrating data and workflows, and enabling technology-driven decision-making using AI, IoT, and automation.

Nebusis® Special Projects

Tailored consulting, development, and integration projects across sectors, including smart city initiatives, public sector reform, industrial automation, and emerging market enablement. Fully project-managed by Nebusis® experts.

■ Nebusis® Project Management Office (PMO)

Get expert-led design, planning, and implementation support for complex digital initiatives. Our PMO ensures projects meet scope, time, cost, and quality goals—with ISO-compliant methods.

Rebusis® Blockchain Solutions

Deploy custom-built or modular blockchain applications for compliance, traceability, secure transactions, and decentralized data integrity—ideal for finance, supply chain, and public governance.

Mebusis® IoT Integration

Harness Internet of Things (IoT) data to improve operations, safety, and performance. We deploy smart sensors and connect them to Nebusis® apps for automated alerts, reporting, and predictive maintenance.

Nebusis® Artificial Intelligence Services

Embed AI into your business operations—from intelligent process automation and predictive analytics to natural language processing and conversational bots. Aligned with ethical and secure AI practices.

♦ Nebusis® Training Programs

On-demand and instructor-led training in digital transformation, ISO standards, AI, data management, cybersecurity, and more. Programs are practical, industry-aligned, and available for certification.

Nebusis® Certification Programs

Certify your knowledge, not just your attendance. Our Al-powered KnowledgeCheck system validates professional competence across compliance, management, and digital skills—issuance of digital certificates included.
